Cognitive science is an interdisciplinary study of the mind that incorporates psychological, philosophical, linguistic, neurobiological, and artificial intelligence approaches to how knowledge is acquired, processed, and represented in the mind. The minor in cognitive science consists of at least five courses totaling 15 credit hours.

- You cannot use courses from the department of your major to satisfy the minor, except when your major is psychology.
- Courses selected to fulfill the area/module and elective course work requirements must come from at least two different departments.
- You may request that the undergraduate advisor in cognitive science approve a non-standard module.
